

Mark Opfell

Exposure & Skills

| | |
|--------------------------------|--|
| RF Standards | FCC, ITU, DVB-S2 |
| Programming Languages | Python, VBA |
| HW Tools | Vector Network Analyzer, Antenna Hats, |
| SW Tools | Excel (Wizard), Pycharm, Git*, Bash, Vi |
| Scientific Python Stack | NumPy, SciPy, Matplotlib, Pandas |
| Significant Ascents | Mount Rainier, Mount Adams (solo) |
| Significant Descents | Camp Muir (winter), Snoqualmie Middle-Middle |

Work Experience

| | | |
|-----------|-----------------------------------|--------------|
| Job Title | Senior RF Systems Engineer | |
| Employer | LeoStella | Tukwilla, WA |
| Period | April 2019 – Present | |

Creating technology roadmaps, architecture diagrams, link budgets, test plans, and running hands-on troubleshooting. Collaborating with suppliers and customers to design, manufacture, test, and operate X, S, GPS, and UHF-band space+ground software defined communication systems while managing cost, schedule, risk, and SWaP. Low-Earth orbit small satellite constellations: BlackSky, Loft Orbital, and NorthStar Earth & Space.

Designed, simulated, purchased, laid out, and validated: parts, mixed signal PCB, connectors, cabling, and enclosure for a GPS RF system self-compatibility filter. Successful in-orbit operation.

Awarded for saving \$0.5 million in recurring cost for flatsat test benches with a deep dive into the technical specifications of the ground and space hardware, and concurrence with vendors.

| | | |
|-----------|-----------------------------------|-------------|
| Job Title | RF Systems Engineer | |
| Employer | Kymeta | Redmond, WA |
| Period | February 2018 – March 2019 | |

Wrote phased array antenna cross-polarization optimization algorithm in Python and integrated it with production level test codebase along with documentation, theoretical and actual response data.

Developed and executed over-the-air combined OSI application, transport, network, and physical layer level test cases for a mobile MIMO Ku-band terminal with software defined phased array flat panel antennas and a DVB-S2 satellite modem

| | | |
|-----------|-------------------------------------|-------------------|
| Job Title | RF Systems Software Engineer | |
| Employer | Space Systems/Loral | Mountain View, CA |
| Period | October 2016 – January 2018 | |

Award winning role leading, developing, and managing a production Python client and services to exchange data between a PostgreSQL database storing 1 TB of antenna data and an RF downlink capacity tool.

| | | |
|-----------|-----------------------------------|-------------------|
| Job Title | Senior RF Systems Engineer | |
| Employer | Space Systems/Loral | Mountain View, CA |
| Period | March 2015 – October 2016 | |

Lead successful Forward downlink payload re-design, deployment, launch, in-orbit test, and handover of geostationary communication satellite Echostar 21 operating the receive at Ka-band and transmit at S-band.

Wrote specifications, triaged vendors, reviewed test data collateral, and directed the installation, unit level and system level tests of the following passive and active RF units: diplexer, waveguide, directional coupler, band pass filter, low noise amplifier, downconverter, high power load, circulator, coaxial cable, master reference oscillator, and synthesizer.

| | | |
|-----------|------------------------------------|-------------------|
| Job Title | RF Systems Engineer | |
| Employer | Space Systems/Loral | Mountain View, CA |
| Period | September 2013 – March 2015 | |

Developed Python analysis tool to model complex amplitude and time delay of 10,000+ passive and active electronic units for a ground-based beam-forming network.

Awarded by the CEO for saving \$0.25 Million and 3 weeks of production schedule with Python tool simulations.

| | | |
|-----------|--------------------------------------|-------------------|
| Job Title | Associate RF Systems Engineer | |
| Employer | Space Systems/Loral | Mountain View, CA |
| Period | June 2012 – September 2013 | |

Automated calculations for the world's highest capacity satellite's gateway downlinks at 32,000 Watts of transmit power.

Developed and maintained budgets analyzing RF channel performance over 80 unique countries during 1.5 year satellite design cycle.

Education

| | |
|------------|--|
| Degree | Bachelor of Science in Electrical Engineering |
| University | University of California, Davis |
| Period | June 2009 – June 2012 |
